What I bring with over 30 years of construction experience:

- Program, Project and Construction Management
- Construction Health and Safety
- Quality Assurance and Quality Control
- Critical Path Scheduling
- Business Development
- Supervision of Field Operations and Office Staff

PROFESSIONAL EXPERIENCE

TNT Industrial Contractors, Inc.

Project Manager, April 2017 - Present

I am currently a project manager in charge of municipal and federal projects involving the construction or upgrades to water, and water treatment projects. Currently in close-out is a \$6M project for the Bureau of Reclamation where I was the on-site, and off-site, project manager during a majority of the 2-year project. The project consisted of additions and changes to existing fish screens and ladder structures on Battle Creek, Northern California.

Another key project currently in construction is the build of a new \$2M domestic water expansion system for the City of Modesto. The project consists of all site civil and underground, electrical distribution, water conveyance and SCADA.

Martin Brothers Construction

Project Manager, July 2016 - January 2017

Federal and DOE project manager for a major sewer lining and rehabilitation at Naval Facilities, Camp Pendleton, CA and an infrastructure project at the Lawrence Livermore National Laboratories, Concord, CA.

Contract Project Manager, PG&E

Project Manager July 2013- June 2016

I provided contract management and financial support for PG&E's SCADA projects throughout California. I was responsible to proactively manage budgets, targets, inspections and subcontractors, and provide overall program support.

My total portfolio of projects consisted of 63 electric transmission and distribution substation sites ranging from \$250K to \$1.6M, all scattered between northern and central California. My substation portfolio included management of engineering, procurement and construction, and frequent financial forecasts and updates with the project schedulers. I was ultimately responsible for the successful completion of portfolio projects from initial funding and scope, through design, construction and closeout.

Patriot Construction, Inc.

Project Manager, August 2012- June 2013

I supported Patriot Construction on projects with the United States Army Corps of Engineers (USACE) and the United States Army Reserve Center. I was responsible for the successful management for interior and exterior renovations of forty-seven buildings, and a historical building expansion and remodel at the Presidio Monterey, CA.

Allied Industries, Inc.

Branch Manager / Project Manager, August 2009-August 2012

Program Manager for completion of 126 housing renovations at Beale AFB. I worked closely with the USACE and on-site personnel to complete the on-time and under budget remediation and renovations of

military housing units. I was a manager for the Army National Guard, and other Federal Governmental projects.

While assigned as the Branch Manager, I lead a successful marketing and business development team that was able to capture several large government projects, and made significant inroads in the in Sacramento environmental and abatement business line.

Allied Industries made the corporate decision to shutter offices and close down operations. I was tasked with restructuring the team in Sacramento to successfully complete and close-out remaining projects thereby limiting our financial exposure. I was the last person to leave the Sacramento office.

Innovative Construction Services, Inc.

Construction / Program Manager, San Juan Unified School District, February 2006-August 2009

Responsible for the construction management of the civil, underground and landscape programs for the San Juan Unified School District. Close interaction with clients, engineers and site administrators, from inception to closure. I was responsible for conducting client meetings involved with brainstorming for new ideas to make the campus both more appealing and accessible. Maintained and reported to management all finances current and forecasted.

ERM EnviroClean

Construction Manager, July 2004 - February 2006

Construction manager for multiple remediation and repurposing projects in California, Arizona and Oregon.

URS Corporation

Project Manager / Task Order Manager, 2001 - July 2004

Project and Task order manager for Army National Guard projects valued at \$11M. Managed many private, municipal and federal environmental remediation and civil projects. Provided on and off-site construction management for numerous civil and environmental projects.

Radian International, LLC

Project Manager - 1999 - 2001 (acquired by URS)

Construction Manager at the Dow Pittsburg Facility, CA for a \$6M bioremediation, and \$7M landfill cap project, respectively
